

ADOBE

HEARING

The Adobe Hearing Center project was an interior remodel of an existing dentist office to create a full service Audiological Medical Practice. Providing hearing evaluations for adults and children, the suite was equipped with isolated hearing chambers, a lab for manufacturing ear molds and hearing aids, exam rooms, fitting rooms, a staff break room, and an ADA accessible toilet room.

Bright Design's experience with this and similar projects helps us meet the special needs of you and your clients.
